Professional Summary

Results-driven Data Scientist and Generative AI Specialist with expertise in Machine Learning, Deep Learning, NLP, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Agentic AI Systems, LangChain, LangGraph, FastAPI, MLOps, and Cloud Deployment. Experienced in designing and deploying production-ready AI applications, intelligent chatbots, recommendation systems, multi-agent workflows, and end-to-end ML solutions.

Technical Skills

Programming : Python, SQL

Data Science : Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Excel

Machine Learning: Regression, Classification, Clustering, Random Forest, SVM, Feature Engineering

Deep Learning : TensorFlow, Keras, CNN, RNN, LSTM, Transformers, NLP

Vector Databases : ChromaDB, Pinecone, FAISS

Backend : FastAPI, Flask, REST APIs

MLOps & Cloud : Docker, MLflow, Git, GitHub Actions, CI/CD, AWS, GCP

Big Data : PySpark

Gen AI/Agentic AI Tools : LLMs, RAG, LangChain, LangGraph, CrewAI, MCP, OpenAI, Gemini, Claude, Hugging Face

Data Analytics & Visualization: Power BI, Tableau, Excel, Pandas, NumPy, Matplotlib

Experience

Data Science Trainer & GenAI Developer | Itvedant (Mar 2024 - Now)

- Conduct classroom and hands-on training sessions in Data Science, Machine Learning, Python, SQL, Power BI, and Generative AI.
- Mentor students through projects, mock interviews, and placement preparation.
- Guide learners in building end-to-end industry-level ML and AI solutions.
- **Developed AI solutions** using LangChain and LangGraph frameworks, demonstrating expertise in generative AI technologies.
- **Implemented and fine-tuned both open-source and paid LLM models**, customizing solutions to meet specific project requirements and performance goals.
- **deploying AI models**, utilizing cloud services to ensure scalability and reliability of AI applications.
- **Develop a chatbot for better student experience using RAG Architecture.** (Like chatbots, Tutor AI Assistant , AI Interview System, AI Resume Analyzer).

Data Scientist Intern | PW Skills - (Oct 2023 - Feb 2024)

- Mentor students through projects, mock interviews, and placement preparation.
- Guide learners in building end-to-end industry-level ML and AI solutions.

Data Analyst | Fine Air Solutions (Feb 2023 – Sep 2023)

- Work on CRM, data collection from different department and stored also enhancing data accuracy and security.
- Perform statistical and predictive Analysis in projects using excel and PowerBI to **minimize cost approx. 8%.**

Freelance Python Developer/ Part Time (2020 – 2023)

- Delivered training programs and Design Curriculum, Mentoring in Python, Data Science, and Machine Learning for organizations including FlipRobo and IIDST.
- Developed solutions involving Web Scraping, ETL pipelines, Exploratory Data Analysis (EDA), Machine Learning, and Django applications.
- Created technical educational content and tutorials on YouTube.

Feature Projects

ATS Resume LLM App [[Code](#)]

- **Overview:** Developed an application optimizing resumes for ATS using OpenAI APIs, enhancing match rates for job applications.

- **Technologies:** OpenAI APIs, Python, AWS, Google Gemini Pro.
- **Outcome:** Achieved a 50% improvement in ATS match rates, increasing users' chances of securing interviews.

Krishi Mitra –Website | Recommender, Prediction and Chatbot System 🤖[Demo]

- Developed end-to-end **crop and fertilizer recommendation system** or **Plant Disease Prediction Chatbot as Farming Expert**.
- Conducted extensive data preprocessing and feature engineering, Experiment with Different ML Models and Achieve **99% Accuracy** in Random Forest techniques.
- Leveraged **Deep learning for Image classification Problem using RESNET** model and got 99.2% Accuracy.
- Use Google Gemini API and **integrate LLMs Chatbot** as a Farmer Expert.

Student Performance Prediction |end-to-end ML Prediction system Follow MLOPS 🤖 [Demo]

- **Task Performed:** EDA, Visualization, Data Modeling, Documentation, Flask API, and Frontend, cloud hosting.
- Built a complete MLOps-enabled machine learning application for student performance prediction.

AI Interviewer/Resume and Job Guide | end-to-end Design and develop scalable GENAI solutions🤖 [Demo]

- Designed and developed a **Generative AI platform** for interview preparation, resume analysis& job matching.
- Integrated GPT, Claude, Gemini, and open-source LLMs for intelligent candidate evaluation.
- Built scalable FastAPI services and end-to-end AI workflows.
- Implemented resume-to-job description matching and personalized career recommendations.
- Evaluated AI outputs using hallucination analysis, response consistency, and context retention metrics.
- Deployed production-ready AI services with monitoring and optimization.
- Experience evaluating: Hallucinations, Response consistency, Context retention,

Research and Detail Analysis AI agent for Product Development using Crew AI 🤖 [Demo]

- Developed a multi-agent AI system using CrewAI for market research and product analysis.
- Built autonomous workflows for data collection, competitor analysis, and report generation.
- Integrated LLM-powered agents to automate research and decision-support tasks.
- Developed Flask APIs and web interfaces for user interaction.

Education

Masters in Computer Application (MCA) Marwari College (8.88 CGPA)

Ranchi, JH 2021 -2023

Bachelors in Computer Application (BCA) DSPMU (8.51 CGPA)

Ranchi, JH 2018 - 2021

Achievements & Certifications

- Get a Data Science Nanodegree - [Udacity](#)
- Earned Google Advance Data Analytics – [Coursera, Google](#)
- Machine Learning and AI projects with python - [Udemy](#)
- Earned a Badge of completion for the Open-Access Data Science Virtual Experience Program – BA [Forge](#)
- Achieved a top 10% ranking in a Data Science hackathon hosted by **Spotle.ai**.
- Python, Problem Solving, SQL - [Hacker Rank](#)
